starline® design grills

Ventilation grills for heat recovery ventilation

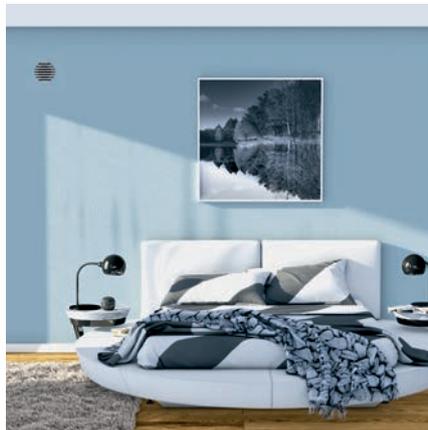

## Easy installation meets stylish appearance

### Design grills – to match any interior style

Exquisite design grills provide each room with a perfect “finish” for heat recovery ventilation. Thanks to the extensive selection of materials, designs and colours, the starline collection will add individual accents to any interior style.

In the profi-air complete system the ventilation unit, the piping system and the ventilation grill form a true “single-source concept” in terms of quality and functionality. For a pleasant indoor climate in the entire building and hygienically sound air exchange around the clock.

### The all-round design grills: Easy installation and variability thanks to innovative magnetic fixing

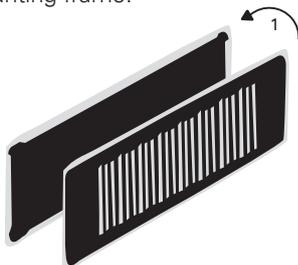

As compared to products by other manufacturers, the innovative magnetic fixing ensures easy manual adjustment,

and the design grill is reliably attached to the mounting frame.

Yet another advantage: The starline design grills can be installed without any tools in just three simple steps.

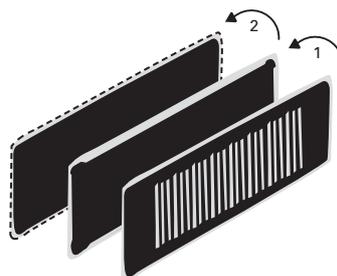

#### Practical, flexible installation in just three simple steps:

1. Connect the design grill and the mounting frame.

The design grill and the mounting frame can be quickly and easily connected with each other by means of two magnets.

2. Install them into the air outlet.

The innovative clamp and sealing connection ensures a secure fit of the design grill in the mounting frame.

3. Align the design grill.

Due to magnetic fixing, precise positioning of the design grill is achieved, and it can be adjusted at any time.

## Benefits at a glance

### Flexible alignment ...

#### thanks to unique magnetic fixing

With the help of unique magnetic fixing, the design grill can be quickly and easily connected to the mounting frame. Then, the grill is simply aligned by hand.

### Easy cleaning ...

#### of the ventilation system

Just one easy move is enough to remove the magnetically fixed grill in order to reach the ventilation system. From here, the entire system can be easily cleaned.

### Easy installation ...

#### without any tools

Installation is as simple as can be: Simply connect the mounting frame and design grill without any tools, and install it in the air outlet.

### Hygienically sound ventilation ...

#### thanks to the integrated filter holder

Practical adjustable flaps secure the filter in the mounting frame and ensure quick and easy filter exchange – for long-lasting hygienically pure air pipes in the entire building.

### Strong connection ...

#### both flexible and secure

By simple insertion into the air outlet, the innovative clamp and sealing connection of the mounting frame is durably reliable and tight. To undo the connection, simply pull the frame out without any tools.

### All designs ...

#### are quite easy to exchange

Thanks to the innovative magnetic connection, different types of design grills are any time fully exchangeable.
